

### The Brand New Normal. A view from Noah's Ark

We are sailing adrift, but it becomes clearer that the world will not be the same anymore. We keep asking ourselves if this "black swan" (in the sense of Nassim Taleb's concept, as an unpredictable event that is beyond expectation with potentially severe consequences) could have been predicted? Too many questions, forget them. We need visions. Visioneers. Architects. Where are the agitators in architecture today, revolutioneers, disloyals, those who destabilize and force vision to move? As the crisis will probably pass and the world will tend to return to "normal", we asked ourselves what that "Brand New Normal" would possibly look like? Is it more sustainable? Is it more ethical? Is it even desirable?

### The new program of live Webinars in May will welcome 32 international guest speakers

As we are moving forward and looking towards brighter days, we all want to push the "Restart" button in various areas of our lives.

The SHARE Webinars in May take control over and press the "Restart" button in how architecture has been represented so far. Still thinking about the future of a post-pandemic era, the webinars will touch on the reshaping of architecture ideas, concepts, and designs.
